WALL STREET, Nov. 26, 1863.

We this week endeavor to show that high prices would be the order of the day even if there had been no suspension of specie payments.

It is so evident that the augmented product of gold and silver from the recently discovered auriferous regions, is working a radical change in the proportion of precious metals to property, that year after year it must take more of the former to measure the latter; and from present appearances, even when we return to specie payments, still higher prices than are now current will prevail.

The market for money is easy to the Stock Exchange. The active upward movement in the Railway speculation creates a fair demand, while lenders outside of Bank have of late increased in number, and many of them are placing large sums at call with the Brokers at 7 per cent., and in some instances, on first-class credits, at 6 per cent.

PRECIOUS METALS.

ANNUAL PRODUCT AT VARIOUS DATES.

From the best authorities within our knowledge we have compiled the following table. It practically shows the *annual* product of gold and silver, since the year 1600, for the Western continent:

From 1600 to 1650, $14,000,000 average pr. an.
" 1650 to 1700, $18,000,000 "
" 1700 to 1750, $22,000,000 "
" 1750 to 1800, $35,000,000 "

For these two hundred years we have estimated the annual product by each half century. We now continue the table, embracing ten years in an estimate:

From 1800 to 1810, $30,000,000 average per an.
" 1810 to 1820, $30,000,000 "
" 1820 to 1830, $18,000,000 "
" 1830 to 1840, $16,000,000 "
" 1840 to 1850, $20,000,000 "

In 1850 California commenced adding largely to the product of gold, and in 1852 Australia

commenced to rival California; and from that date to this the annual product from these two localities—new localities—for eleven years, has been $100,000,000 per annum, while the other gold fields have, by the aid of steam and machinery, crushed out more than their former average product.

In brief, we may safely say that

Up to 1850 the annual product was about $30,000,000; since 1850 the annual product has been about $145,000,000.

COMMENTS.

Whatever the product of gold and silver for the whole world may have been during the prosperous periods of Jewish and Roman history, it is evident that all through the dark ages the precious metals rested in the earth. The discovery and subjugation of Mexico brought to the markets of Europe an amount of gold and silver at that day considered enormous, but which never for one year equalled the product of Australia even, for any one of the past ten years, saying nothing of California.

It will be observed that from 1800 to 1840 there was a constant decrease in the product. In this fact we have the reason why the elder portion of the people, not only of this country but of Europe, find it so hard to understand the changed condition of values or prices. The man who learned the value of a dollar during the first half of the present century, cannot easily realize that eleven years have made say three dollars equal only to one formerly. Hence we find so much error in the public mind in attributing the revolution in prices wholly to the depreciation of the currency.

Wall Street is stripped of 5-20 bonds for cash delivery, and the best that we can do is to promise them out of the earliest issues that may be made; and we hardly think the stock of bonds on hand will be good before the first week in Dec. In the meantime we are receiving subscriptions for bonds to bear interest from the day the money is received, and dividing our commission with the subscribers.

The First National Bank of this city, one of the Government Agents for the 5-20 loan, is also filling orders for subscribers.

The 5-20 bonds with full coupons from Nov. 1st, are in demand at 100⅝@100½. This is about one quarter of one per cent. dearer than to subscribe.

The current opinion is that the high prices are wholly the effect of the paper money expansion. This opinion is only about half correct. High prices are caused by several things. The increased product of the precious metals would of itself have sustained higher prices than formerly, if there had been no suspension of specie payments. Then, taxation is an elevating element; and the decreased amount of labor and the increased consumption aid the elevation of prices. While we admit that paper money is partly, probably about one half the cause of the rise in prices, we earnestly contend that these other causes should have due consideration in the premises.

It is now said that the Secretary of the Treasury is preparing the interest-bearing legal tender notes, not only for the 50 millions due to the Banks, but for the public. This, we conceive, is a preparation too long delayed. Had Mr. Chase offered these notes to the people last summer, he would have got all the money he needed, without in the least disturbing the money market, and saved more than fifty thousand dollars, which the Banks have by simple book credits made out of him. It is a singular fact that the Hon. Secretary has never made a negotiation with the Banks that did not disturb the money market, to the detriment of his popular borrowing from the people, to say nothing of the interest money that he has paid on money not had.

It is said that Mr. Secretary Chase is in favor of making the National Bank Currency a legal tender during the suspension of specie payments, as fully as Treasury Notes. National Bank Currency is, in the Act authorizing banking, made a legal tender in transactions between the Government and the people, except for duties and interest money. To declare it a legal tender between man and man, will be but a slight alteration. In fact it is an amendment necessary for the equitable working of payments. As the law now is, a man *must* take it of the Government, but he cannot compel his creditor to accept it in turn. This will not work well. The Government should not compel a creditor to take currency that will not in turn legally discharge a debt.

WHAT TO DO WITH THE ACCUMULATION OF GOLD FROM CUSTOMS.

The Act of Feb. 25th, 1862, contains the following Section:—

SEC. 5. All duties on imported goods shall be paid in coin, or in notes payable on demand heretofore issued and by law receivable in payment of public dues; and the coin so paid shall be set apart as a special fund, and shall be applied as follows:

First. To the payment in coin of the interest on the bonds and notes of the United States.

Second. To the purchase or payment of one per ct. of the entire debt of the United States, to be made within each fiscal year after the 1st day of July, 1862, which is to be set apart as a sinking fund, and the interest of which shall, in like manner, be applied to the purchase or payment of the public debt, as the Secretary of the Treasury shall from time to time direct.

Third. The residue thereof to be paid into the Treasury of the United States.

The law is that the accumulation of gold from customs "*shall be applied as follows:*"

1st. For interest money.

2d. Purchasing United States debt to the extent of one per cent. per annum of the entire debt, or as much thereof as the accumulation of gold will warrant.

The fiscal year ending June 30, 1863, did not yield gold to an amount beyond the interest on the public debt, but during the present fiscal year is yielding gold for the purchase of Stocks.

"One per cent. on the *entire* debt," is the language of the law. One per ct. on $1,500,000 000 is $15,000,000. It therefore follows that Mr. Chase must, some time before July next, use his accumulation of gold in the purchase of U. S. Stocks.

It will be further observed that the Stocks purchased are to be set apart as a sinking fund, and the interest arising on that sinking fund is also to be invested in further purchases.

Our Descriptive List,

TWENTY-FIRST EDITION,

Newly Illustrated,

Is now ready, containing all the new Banks, with an accurate description of all their Notes issued up to the present time; also many additional new Bills of old Banks not heretofore described. This is the most valuable work of the kind extant, and the price (25 cents) places it within the reach of every one.

The additions to our DESCRIPTIVE LIST OF GENUINE BANK NOTES are, and always will be, continual; so much so (as Banks issue new Notes and new Banks are organized), that the *latest edition* is almost as *indispensable* as the last issue of the REPORTER.

The superior feature of this work is, these additions and revisions are made in the body of the book itself, which is a great advantage over the *stereotyped* concerns where alterations can only be made by a *Supplement* or fly-leaf.

Embodied in our DESCRIPTIVE LIST will be found an extract from the laws of each State, relating to Legal Interest and Usury, with its penalties; Home and Foreign Drafts, with the damages when protested, &c.

We would call attention to our new and handsome engravings of the Arms of each State, which will enable the reader to distinguish the State Arms from the Comptroller's Die.

The DESCRIPTIVE LIST contains an exact description of all Bills issued by the Banks in the United States and Canada, and is published at the exceedingly low price of

Twenty-five Cents,

or, two copies a year, gratuitously to each Subscriber to

THOMPSON'S REPORTER,

First National Bank of New York.
GOVERNMENT AGENCY FOR THE NATIONAL LOAN,

THIS BANK has been appointed a Government Agent for the sale and distribution of *United States 5-20 Bonds*, and is now ready to receive orders and subscriptions for the same in Bonds to bearer, of the denominations of $50, $100, $500 and $1,000, or in Certificates of Registered Stock in the name of the applicant.
These Bonds will be furnished at par, interest to commence on the day we receive the money, and a *Commission of one eighth of one per ct.* will be allowed to Banks, Bankers, Savings Banks, and Dealers in Government Securities.
The Government is now able to supply Bonds with very little delay; but for the greater convenience of the public we propose to keep always on hand a full supply of Coupon Bonds, of the several denominations, for immediate delivery.
The Bank will also deal largely in all classes of Government Securities, and will, at all times, buy or sell them at very favorable rates.
Accounts opened with this Bank will receive the greatest care and attention, and interest will be allowed on deposits in cases specially agreed upon.
Our correspondence with all accessible points in the United States and Canadas, enables us to receive Collections, Domestic and Foreign Exchange, &c., on as advantageous terms as any other institution in the country.
SAML C. THOMPSON, *President.*
